

SAKSHI DIWAKAR NANDANE

Location: Nagpur – 441110

Phone: +91 87998 24319

Email: Sakshinandane7@gmail.com

LinkedIn id: <https://www.linkedin.com/in/sakshi-nandane>

CAREER OBJECTIVE:

Motivated and enthusiastic Computer Science (IoT) undergraduate with a strong desire to apply technical skills, collaborate in teams, and contribute to real-world solutions. Eager to grow through hands-on experience in a challenging and dynamic work environment.

LANGUAGE :

- English
- Hindi
- Marathi

SOFTSKILLS:

- Teamwork and Collaboration
- Problem-Solving

CERTIFICATION:

- Introduction to Front-End Development (Coursera)
- Data Structures and Algorithms in java (Udemy)

DECLARATION:

I hereby declare that the above information is true and correct to the best of my knowledge

EDUCATION

- BTech – Computer Science & Engineering (IoT) YCCE, Nagpur – RTMNU
- CGPA: 8.2
- HSC – Maharashtra State Board (2021) – 89%
- SSC – Maharashtra State Board (2019) – 82%

TECHNICAL SKILLS

- Programming Languages: JavaScript (React), Java, Python (Basic), SQL
- Tools & Concepts: IoT Systems, Web Development, APIs.

PROJECTS

- **Portfolio Website:** Developed a responsive personal website using HTML, CSS, and JavaScript to showcase my resume, technical skills, and project work. Incorporated smooth animations and a mobile-friendly layout to create an engaging digital presence.
- **Quiz App:** Created a browser-based quiz application with dynamic questions, real-time scoring, and feedback. Built entirely using HTML, CSS, and JavaScript, the app demonstrates event handling, logic implementation, and interactive UI design.
- **To-Do List:** Built a simple yet functional task manager using HTML, CSS, and JavaScript. Features include adding and removing tasks with persistent storage via localStorage. Emphasizes front-end logic and client-side data management.
- **Hotel Menu CLI:** A console-based restaurant ordering system developed in Python. Users can select food items, input quantity, and receive a total bill. This project showcases control structures, list handling, and menu-driven program design.
- **Crop Sential:** An innovative smart farming project combining IoT sensors and machine learning to detect and deter animal intrusion in crop fields. Utilizes motion sensors, camera modules, and alert systems for real-time animal detection and farm protection.
